

## Ryder Expands Leadership in Commercial Electric Vehicles, Places Reservation for Additional 500 Chanje Electric Vans

---

**MIAMI, June 7, 2018** – Ryder System, Inc. (NYSE: R), a leader in commercial [fleet management](#), [dedicated transportation](#), and [supply chain](#) solutions, announced today that it has reserved 500 new Chanje Energy medium-duty electric panel vans, expanding its North American electric commercial truck [rental](#) and [ChoiceLease](#) fleet. The reservation will be executed as lease agreements for the Chanje electric vehicles (EVs) are finalized. Ryder is the exclusive sales channel and service partner for Chanje and its medium-duty EV fleet for which Ryder is offering truck leasing and preventive maintenance solutions as part of Ryder’s [ChoiceLease](#) and [SelectCare](#) fleet maintenance portfolio.

**TWEET THIS:** [@RyderSystemInc](#) reserves 500 [@ChanjeEnergy](#) electric vehicles intended for its lease & rental fleet. #EVs #RyderAdvancedVehicles

“Ryder continues to see broadening interest in EVs from businesses of various sizes and industries, and especially from those companies in the parcel, final mile, or beverage delivery space. Additionally, there’s interest from customers who have daily return to base routes of 40 to 100 miles and in markets with incentives available for electric vehicles,” said Dennis Cooke, President, Global Fleet Management Solutions for Ryder. “Companies continue to identify the potential long-term cost, environmental, and efficiency benefits of EVs. We’re proud to expand our relationship with Chanje and expect additional business announcements based on our sales pipeline. This latest announcement with Chanje is one more way we are demonstrating our commitment to maximizing the performance of our customers’ fleets, while providing the flexibility and convenience to implement EVs into their operations.”

Ryder is continually monitoring emerging fleet technologies and works closely with the technology providers and equipment manufacturers building innovative features to provide feedback around functionality, usability, and adaptability.

The Chanje all-electric large delivery style van is equipped to haul up to 6,000 pounds and up to 580 cubic feet of cargo, all with zero vehicle exhaust emissions and class-leading, 100-mile range on a single charge. Ryder has equipped several maintenance facilities across the San Francisco, Los Angeles, San Diego, Sacramento, and San Jose, Calif. markets, as well as the Chicago and New York markets, to meet the service and charging requirements for commercial EVs. Chanje vehicles are the first to be designed from the ground up as an electric truck platform, helping set industry standards for electric and high-quality mass production.

“We are pleased to partner with Ryder to meet its customers’ evolving performance, cost, and sustainability goals and collectively shape the future of the industry,” said Bryan Hansel, founder & CEO of Chanje.

#### **About Ryder**

Ryder is a FORTUNE 500® commercial fleet management, dedicated transportation, and supply chain solutions company.
